

Good morning. I believe that telemarketers have a right to make a living but not at expenses as people like that do not welcome unsolicited phone calls. For at least the last six months we have been receiving this computerized message twice a day: "This is Martha...". I am in favor to keep to make the do not call law even more strict so that telemarketers would stop calling you one week after you file the forms and not the three months. The majority of these telemarketers are abusive, intolerant, etc. In summary THEY are a pest! Please keep the privacy of my telephone safe.

Sincerely,
SDP
